

Let's blast our way through vocabulary!
Draw a line to match the word with the correct definition.

rendezvous	the energy needed to put an object into space
jettison	spaceships/satellites/vehicles meeting in space
thrust	where astronauts live during the flight into space and back to Earth
capsule	the angle at which a spacecraft will fly around the Earth
inclination	a black hole surrounded by a Frisbee-like cloud of gas
quasar	throw something away, out into space

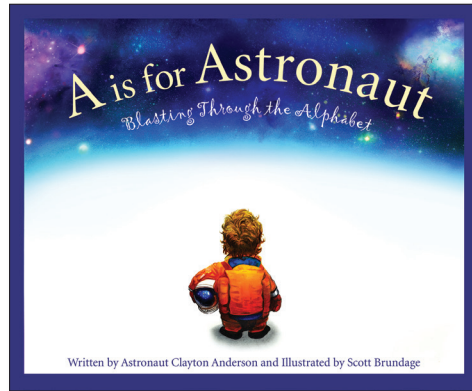

If you were able to meet an Astronaut, what question would you want to ask?
